## PROJECTS

### WaldMap (Jul 2011)

Bing Maps Silverlight Control used as a primary interface for showing timberland information, using maps generated from geospatial data (GIS maps and shapes) combined with related data from the forest management system database.

[C#, .NET4.0, Silverlight, Bing Maps Silverlight Control, WCF RIA Services, Entity Framework, SQL Server 2008 R2](#)

### WaldProjekt (Jul 2010)

Forest management application used for collecting the data acquired during the field surveys in the forest, and calculation of various results like annual timber growth. Contains over 300 reports with detailed information covering various aspects of timberland management.

I was the external consultant responsible for database model design and core business logic, as well as providing guidance for client's in-house developer focused mostly on data entry forms and reporting.

[C#, .NET4.0, ASP.NET, ADO.NET DataSets, SQL Server 2008](#)

### Ljudski Resursi (Jan 2010)

Human resources management with employee records, attendance registration using the contactless card reader, and automated payrolls combining the data from the Attendance module and MS Dynamics NAV production order records. Various reports.

[C#, .NET3.5, WinForms, Entity Framework, SQL Server 2005](#)

### FootballWorldChain.com (Dec 2009)

Soccer resources and information website.

[C#, .NET3.5, ASP.NET, ADO.NET DataSets, SQL Server 2005](#)

### NAV Object Comparer (Feb 2009)

Objects comparison tool for Microsoft Dynamics NAV.

**Won 3rd place of "Best download of 2009"** on [mibuso.com](#)

[C#, .NET3.5, WinForms, ADO.NET DataReaders, SQL Server 200x](#)

### Payrolls Module for MS Dynamics NAV (Sep 2007)

Developed and registered as an **Add-On solution for NAV**.

[MS Dynamics NAV 4.0, SQL Server 2005](#)

### POSkasa (Jan 2006)

POS receipts, inventory and financial mgmt for small stores.

[Delphi 7, IBX, Firebird](#)

### Plate (Jul 2002)

Payroll application for metal manufacturing company.

[Delphi 7, ADO, Access](#)

### PlaStol (Feb 2002)

Raw materials calculator for PVC windows manufacturer.

[Delphi 5, BDE, Paradox](#)

### KPR (Apr 2000)

My first windows application used for revenues and expenses tracking and gain/loss calculation.

[Delphi 3, BDE, dBASE](#)

### LD (Sep 1999)

My first "useful" application – a simple payroll calculator.

[Turbo Pascal 7.0](#)
